

PV Experts Project: Final Event & Meeting and Key Outcomes

January 2026

4th PRESS RELEASE

OVERVIEW

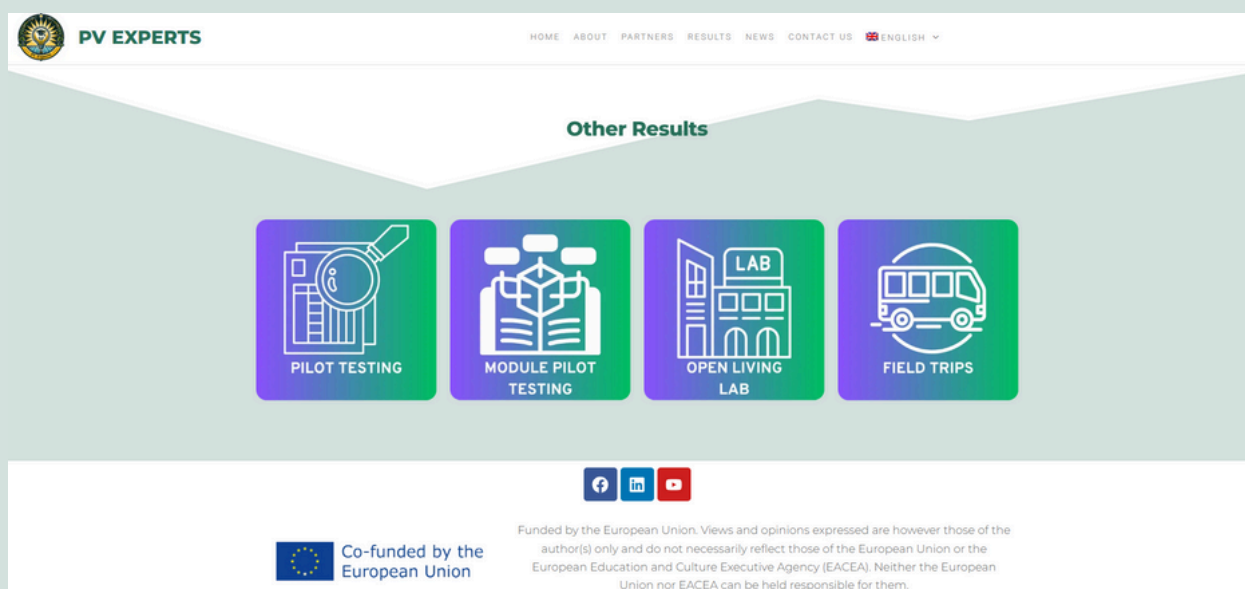

The PVExperts project aims to educate VET educators and students on the fundamentals of photovoltaic energy through innovative pedagogical approaches that stimulate interest and motivation in the photovoltaic (PV), solar thermal (ST), and photovoltaic-thermal (PVT) sectors.

On 11 December 2025, the PV Experts Final Event took place at Avgorou Technical School, bringing together educators, VET learners, technicians, and key stakeholders. The event provided a platform to explore practical skills development, digital learning tools, and the future of solar energy training in PV, ST, and PVT technologies, including smart monitoring solutions, highlighting the project's overall contribution to strengthening high-quality vocational education and training in the solar energy sector.

OUTCOMES AND EXCHANGE

Following the latest project developments, the PV Experts website has been updated with additional key results stemming from the implementation phase of the project. These include the outcomes of the Pilot Testing, Module Testing, Open Living Lab, and Field Trips, which played a crucial role in validating the educational content and ensuring its relevance to real-world vocational education and training (VET) settings. Through the active involvement of students, educators, and industry professionals, these activities provided valuable feedback and hands-on experience, further enhancing the quality and impact of the project's outputs.

During the Final Event, the PV Experts project was presented in its entirety, offering participants a comprehensive overview of its objectives, scope, and overall contribution. All key project outcomes were showcased, including the PV Experts Interactive Handbook, the Online Training Module, the Open Living Lab, as well as the educational videos and learning activities developed within the project. This holistic presentation ensured that participants gained a clear understanding of the project's results and its significant role in strengthening high-quality vocational education and training in the solar energy sector.

PVEXPERTS FINAL TRANSNATIONAL PROJECT MEETING IN UPPSALA, SWEDEN

On 20–21 November 2025, the PVExperts consortium convened in Uppsala, Sweden, for the Final Transnational Project Meeting, marking an important milestone in the project's implementation. Project partners and team members gathered for two highly productive days to review key achievements, finalize project outcomes, and reflect on the successful collaboration established throughout the project's lifecycle.

The meeting provided a valuable platform for in-depth discussion, knowledge exchange, and strategic planning, ensuring that the project's results will continue to support VET learners, educators, and stakeholders across Europe beyond the project's duration. The event also highlighted the strong partnership built among the participating organizations and their shared commitment to advancing high-quality vocational education and training in the solar energy sector.

We warmly thank all partners for their dedication, expertise, and continuous collaboration throughout the PVExperts project.
